

# Sovereign Logistics

## Our Mission

We specialize in international freight forwarding, transportation and distribution services. Our logistics professionals create nimble and comprehensive end-to-end solutions which enable our customers to focus on efficiently growing their core business and products.

## Our Vision

We strive to be recognized by our customers as an industry leader in global transportation related services. We will earn our customer's trust through operational excellence and continuous improvement driven by our people, processes and technology.

## Account Management Services

At Sovereign Logistics we believe account management to be a key element of any successful partnership. We learn about and thoroughly understand our customers business requirements and objectives. We select the best fit from our account management resources to directly support our customers in providing clear, accurate and timely information. We provide a single point of contact supported by a dedicated team. We operate to the agreed upon SOP targeting 100% compliance.

## Ocean Freight Services

Sovereign Container Line is a premier, wholly owned NVOCC and licensed OTI providing full service offerings encompassing LCL and FCL freight management. Through our long term contracts with ocean carriers and port operators, we provide reliable access to ocean equipment and chassis combined with flexible departure, arrival and on carriage delivery options.

## Airfreight Services

Sovereign Logistics is a full service indirect air carrier (IAC). Through our long term contracts with all major passenger and cargo airlines, we efficiently aggregate and manage our customers airfreight to and from all global markets. Sovereign is a world class air consolidator utilizing our exclusive international network supported by our cloud based track and trace systems.

## Truckload Brokerage, Warehousing & Distribution

Our prequalified carriers provide immediate capacity and access to truckload and LTL freight brokerage services. Sovereign's warehousing facilities and capabilities stretch across all major global markets and offer the following services. Consolidations, palletizing, sorting and segregation, QC, cross docking, packaging, storage, e commerce and any specialized additional services tailored to the needs of our customers supply chains and shipments.

## Sovereign Differences:

We link our origin and destination services with our freight forwarding services, and integrate data within our industry-leading cloud based technology:

- Order Management
  - Gain control of inbound product flow, exception management of orders before they become shipments
- Origin and Destination Services
  - Increase the efficiency of your supply chain. Identify opportunities for order and shipment consolidation & optimization
- International Freight Forwarding
  - Comprehensive ocean, air and ground transportation, build SOP's & follow customers business rules
- Trade Management
  - Effectively navigate the complex world of international commerce, sourcing and regulatory requirements
- Reporting and Visibility
  - Improve information accessibility and gain control
- International Supply Chain Management
  - Continual client satisfaction through hands-on attentive Account Managers
